Head Office: USA (Private)

Capability Statement

Independent buyer-side brokerage focused on compliant coordination with terminal-linked counterparties for refined petroleum products. Designed to reduce time-waste through verification-first alignment.

Core Focus

- Buyer-side representation and transaction coordination
- Terminal-linked outreach and procedural alignment (T2T / TTT where applicable)
- Controlled document exchange with broker protection (non-bypass positioning)

Products

- Diesel EN590 (10 PPM)
- Jet Fuel A1
- D6 / Crude Oil (case-by-case)

Compliance Position

- Seller-side sanitized verification precedes buyer TSA/ICPO/banking documentation
- Initial review accepts sanitized PoP (availability/terminal confirmation/TSR or equivalent, mandate/CIS, sanitized procedure)
- If counterparty requests buyer TSA/financial docs before seller-side verification, we pause and move to Plan B

Engagement Steps

1. Seller-side sanitized PoP package received
2. Alignment call or F2F (if required) to confirm procedure sequence and timeline
3. Operational execution per aligned procedure (dip test / injection / payment)

Notes

- We do not claim ownership of product, storage, vessels, or title.
- Head office address shared privately when required for compliance.
